Thank you for acquiring alphaPhonetics from the <https://alphaphonetics.com> website. If I may say so it is an excellent value for your money and arguably the best and easiest to use NATO alphabet reference. I often make the software freely available to selected organizations. If you somehow obtained a copy of the software without purchasing from the website or by my donation to your organization and choose to compensate me please send me \$12.00 at <https://paypal.me/ClintonGallagher>.

## OVERVIEW:

alphaPhonetics is a NATO alphabet phonetic spelling reference that I have developed for English and Spanish speaking people. Its purpose is to assist anybody who uses a telephone or other communication device to spell phonetically thereby reducing and eliminating any and all unforeseen adverse circumstances that occur when words and names are misspelled. It is interesting to note you will one day realize you have memorized the phonetics and will no longer need the app: GOAL ACHIEVED!

## GETTING STARTED:

Locate the alphaPhonetics.zip file where you downloaded it and unzip the .zip file archive, then move the .zip file to a location where it will be backed up. The unzipped folder will contain an executable file named alphaPhonetics.exe that does not require installing. The executable will run from any location on a storage device or from a shared network; even from a USB flash memory stick. All you have to do to run the software is double-click on alphaPhonetics.exe or its shortcut and the app will run.

## DISCLAIMER:

The person who uses the software acknowledges he or she receives the software on an "as is" basis. The developer and copyright owner accepts no responsibility whatsoever arising from the use or application of the software. The software uses no means whatsoever to track usage. Do not run the software if you cannot agree with this disclaimer.

## RECOMMENDED:

Create a shortcut of the alphaPhonetics.exe file and save it to the desktop. Pin the shortcut to the Taskbar or **–better yet–** make a copy of the shortcut and paste it into the Windows Startup folder: alphaPhonetics will then start and run everytime you load your Windows Desktop.

Location of the Startup Folder
